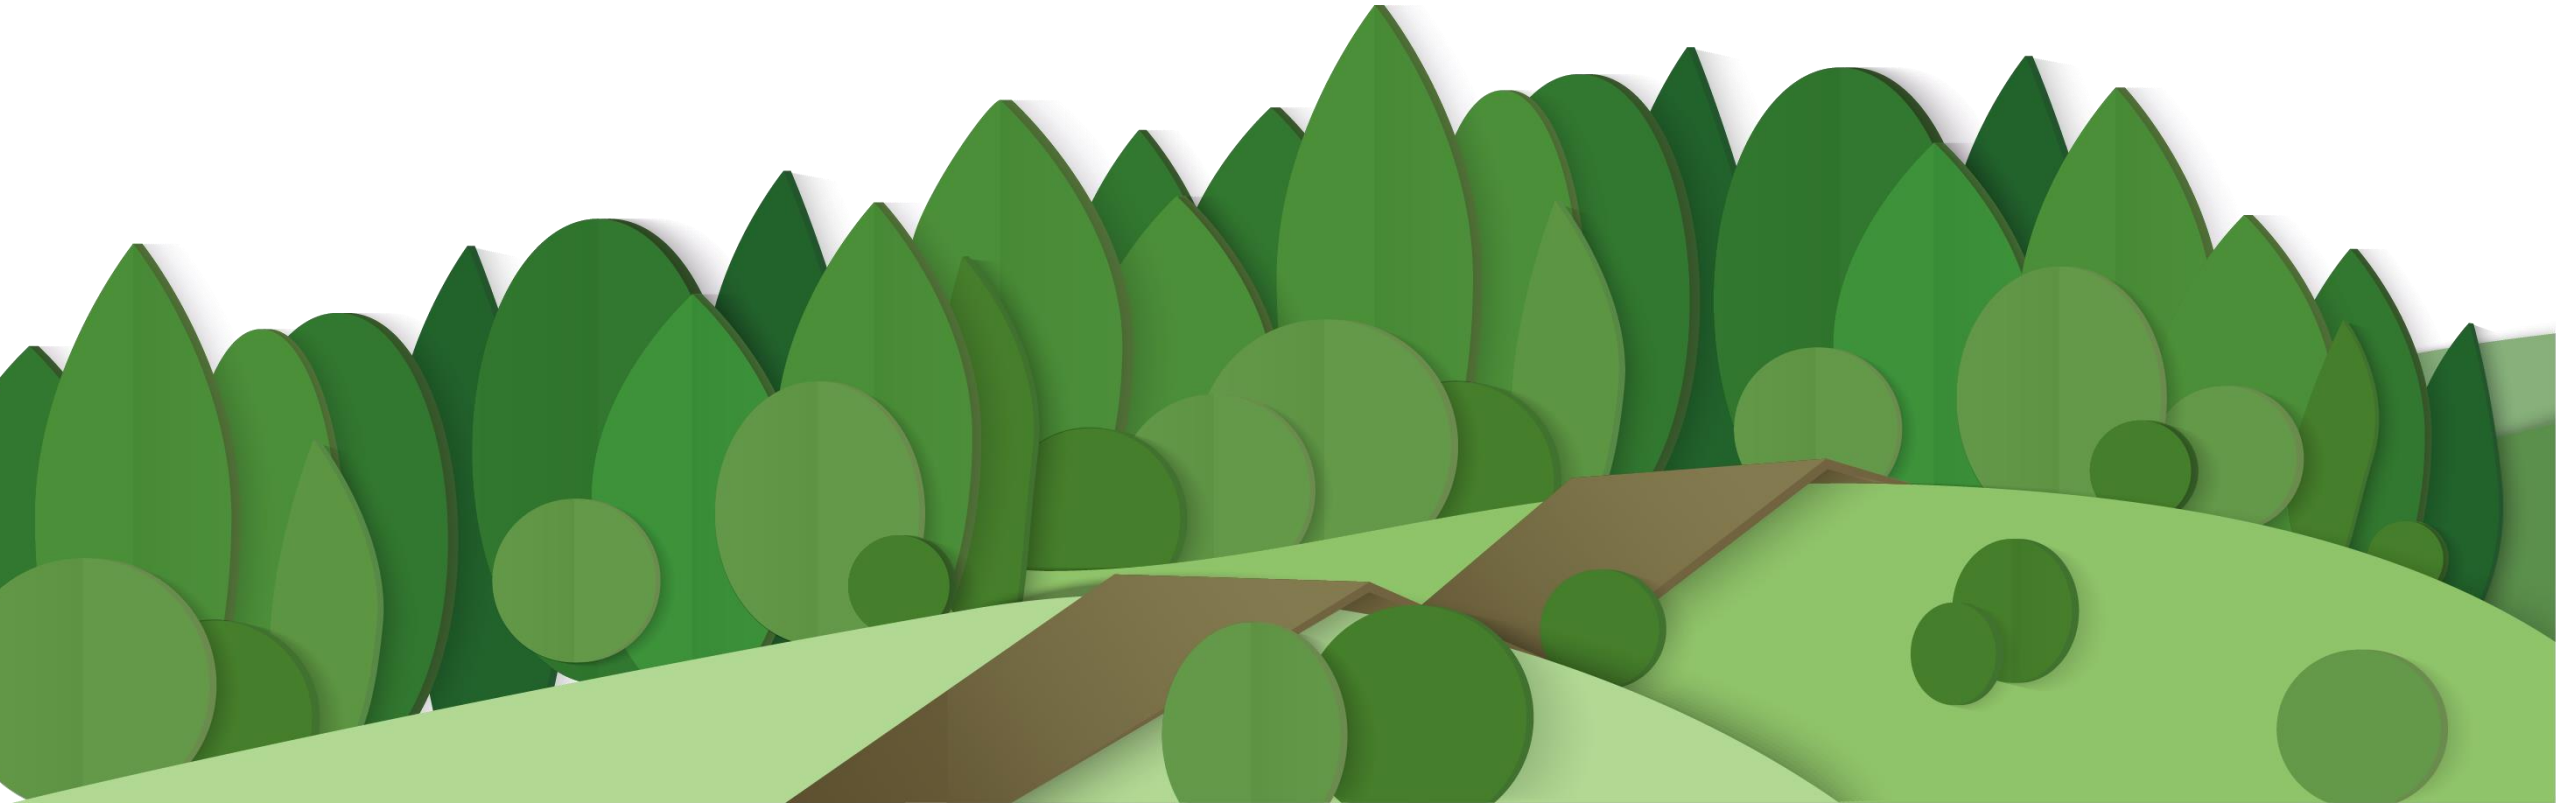
What do YOU value about Hamilton's Urban Forest?



Urban Forest Strategy for Hamilton

Urban Forest: The urban forest includes all of the trees and woodlands growing on public and private lands, including parks and cemeteries, natural areas, streets, and in residential, commercial, industrial, and institutional areas.

Source: City of Hamilton

Purpose: To develop a **VISION** and prepare a plan that outlines the necessary steps that must be taken to **protect, maintain, enhance**, and **monitor** the trees and forests in the urban area of Hamilton over the next 20 years and beyond.
